

VertiMax

640W WATT LUMINAIRE

P.L. LIGHT SYSTEMS

THE LIGHTING KNOWLEDGE COMPANY

DELIVERING MAXIMUM PERFORMANCE IN VERTICAL APPLICATIONS

The VertiMax is a high-output LED lighting solution that delivers optimal lighting performance in multi-tier applications. With a PAR output of 1800 $\mu\text{mol/s}$ and a system efficacy of 2.8 $\mu\text{mol/J}$, the 640W luminaire offers exceptional performance and big energy savings.

Designed to deliver light uniformly across the entire width and length of the grow rack, the VertiMax enables maximum space and yield efficiencies.

KEY FEATURES & BENEFITS INCLUDE:

- Broad spectrum optimized for full growth cycle in sole source applications
- Delivers optimum light levels across the length and width of shelf—while minimizing light loss off the sides of the shelf.
- Integrated driver for reduced installation time and expense
- Dimmable for seamless integration with compatible control systems
- Ultra low-profile design and low radiant heat output, lends itself ideally to vertical applications
- Daisy-Chainable
- Simple plug-and-play platform
